

LW3 Vehicle Barrier

The AVS-elli LW3 barrier is an effective, unobtrusive vehicle barrier providing protection for narrow trafficable/ small roadways & lane ways, car parks and access doors. Surface mounted, recessed or semi-surface mounted ensuring that no side space is required, space effective and unobtrusive, re-locatable if required.

Ideal for managing traffic flow - the barrier becomes a "Traffic-trainer" when folded if installed in a surface or semi surface mount configuration. Bolt down fixing allows rapid replacement after incident and for ease of service.

LW3 Vehicle Barrier

- ◆ Rapid-install.
- ◆ Re-locatable.
- ◆ Single Ram.
- ◆ Opens in 2.5-3.0 sec.
- ◆ PLC Control.
- ◆ Surface mount using chemset anchors or cage foundation mount.
- ◆ All delicate components are above the “water table” and therefore not subject to long term water inundation.
- ◆ Bolt down fixing allows rapid replacement after incident and for ease of service.
- ◆ Easily transported in standard air freight container.
- ◆ Pre-fabricated foundation minimizes shipping bulk and cost.
- ◆ SCEC endorsed and PAS 68 barriers available.

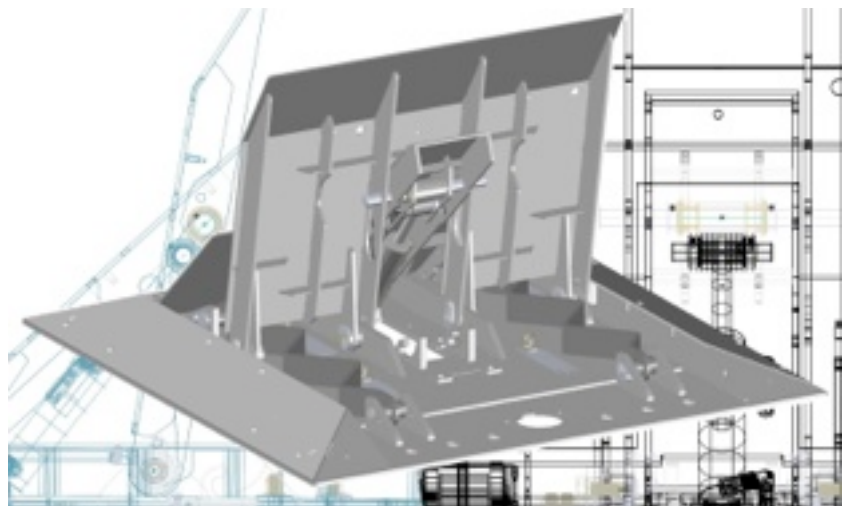

Dimensions	Overall Width: 1390mm
	Blade Width: 950mm
	Height (Up): 800mm
	Height (Down): 110mm
	Depth: 1390mm
	Weight: 300Kg

AVS-elli barriers have protected the Prime Minister of Australia, the Cabinet of Australian Government, the last 2 Presidents of the USA when visiting Australia and the English Princes when they visit.

The AVS-elli designs are clean sheet designs developed by us over the last eight years to provide a flexible adaptive barrier for use where standard foundation type barriers are not appropriate, or local weather conditions mean that long periods of water inundation are unavoidable.

Options

- Automated PLC controlled hydraulic operation or manual operation.
- Laser and infrared safety devices.
- IP rated control cabinets.
- Safety lighting & signage.
- Alternative colours.
- Single phase or three phase pump.
- Power fail/backup systems.
- Wired and wireless controls.
- Alternative power operation.
- Full integration with security and building management systems.

Note: Specifications may change without notice.
